Denplan

As a member of Denplan all the routine care and treatment needed for healthy teeth and gums is covered by a monthly payment.

The monthly amount is determined by an examination of your mouth.

What you pay depends on a number of factors including how many fillings, root fillings and crowns you have. A special examination of your mouth by your dentist gives us the information we need to tell you what your level of payment will be.

In the current year the monthly amounts (£) for the five payment bands are as follows

A	B	C	D	E
13.18	19.13	23.24	30.86	36.72

As an illustration a person with an average number of fillings and healthy gums may be in band B or C. Someone with a number of root filled teeth and/or crowns and bridges could be in D or E.

There are some items that Denplan Care does not cover for example cosmetic treatment and items incurring laboratory fees.
